POPULAR

VACUUM FRUIT AND VEGETABLE

BOTTLING OUTFITS

Have Proved a Valuable
Asset in Thousands of Homes.
WHY NOT IN YOURS?

THE FRUIT MAY BE BOTTLED IN WATER OR SYRUP AS DESIRED

PACK the Fruit into the bottle, fill the bottle with WATER or Syrup, put on the rubber ring, then the cover, and finally the spring clip. The filled bottles are then placed in the Sterilizer. Water is put into the Sterilizer until it reaches about three parts up the sides of bottles. The Sterilizer is placed on the gas stove, fire stove, oil stove, or where an electric sterilizer is used it is plugged into any standard three-pin power point, and heated until the thermometer registers the temperature indicated in the 112-page Copyright Book of Instructions, for the particular fruit or vegetable being bottled. After the temperature has been maintained for the specified time, according to the instructions, the bottles are lifted out, generally with a pair of bottle tongs, and are placed on a shelf or table to cool. The next day, when the bottles are thoroughly cold, the clips are taken from them, and the covers will be found to be automatically hermetically sealed during the sterilizing process. The contents will keep indefinitely. Vegetables are sterilized twice.

A 112-page Copyright Book of Instructions accompanies each Outfit, giving the necessary temperatures and other data for successfully Preserving all kinds of Fruit, Vegetables, Fish, Meat and Poultry in the Vacuum Bottles.

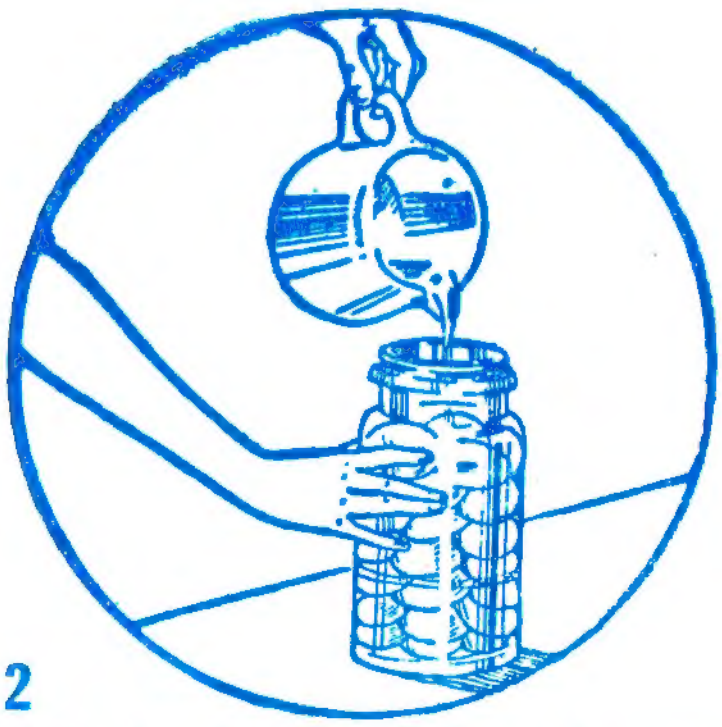
We are very pleased to hear from customers at all times, and if you are satisfied with your Outfit we solicit your kind recommendation to friends—if not satisfied, write to us. Clients writing for special instructions, recipes, or seeking information **must** enclose a stamped addressed envelope otherwise letters will not be answered. Owing to the hundreds of letters received weekly specially during the Fruit Season, letters cannot be answered promptly but queries will be answered even though there may be a slight delay.

PERFECT PRESERVES IN SIX SIMPLE OPERATIONS

BY THE FOWLER-METHOD

1

Pack the fruit firmly in the bottle.



2

Fill the bottle with water or syrup.

3

Put on rubber ring, cover and clip.

4

Place the bottles in the sterilizer, pour in water till it reaches three-parts up the sides of the bottles. Heat till the thermometer registers the correct temperature.

5

After the time specified in the book of instructions, take the bottles from the sterilizer.

6

When cold, slip off clips, and pack the fruit in cool, dark place.

No. 1 OUTFIT

Special Note:

Consisting of: 1 Fowlers "VACOLA" Electric Sterilizer, complete with "High" and "Low" Switch, 5 feet Heavy Rubber Armoured Cable and 3-pin Wall Plug; Bottles and Fittings as in No. 2 Outfit illustrated above.

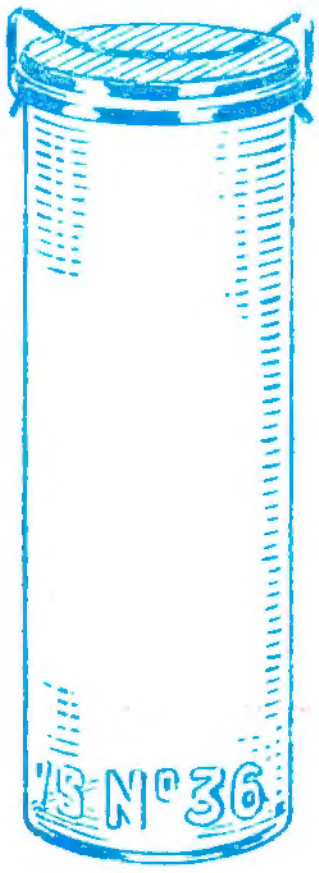
PERFECT PRESERVES GUARANTEED

By FOWLERS METHOD

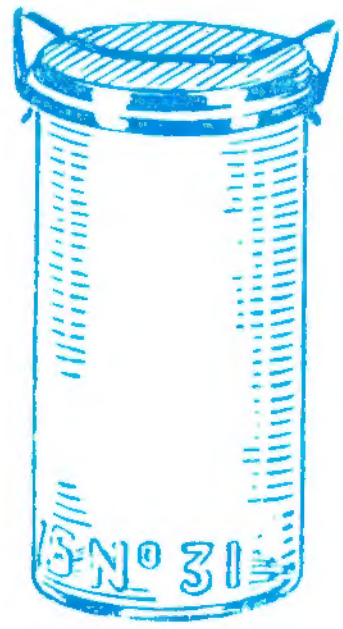
Milk and Fruit Juice Bottle.

THE SUPERIORITY OF FOWLERS JARS

FOWLERS Jars and patent vacuum method of sealing assure absolute satisfaction. There is no adjusting of screw-tops, bands or wire clamps on hot bottles, which usually causes failure. The Fowler method works scientifically and automatically, and the Bottles are self-sealed during the process. By the Fowler way every particle of air is excluded during the sterilizing process, and the automatic action of the vacuum then comes into operation and holds the cover in position, so that no air can get in, and no fermentation can take place. When the Bottles are cold, the clip is slipped off and the Jars packed away for use. The contents will keep in perfect condition for years.



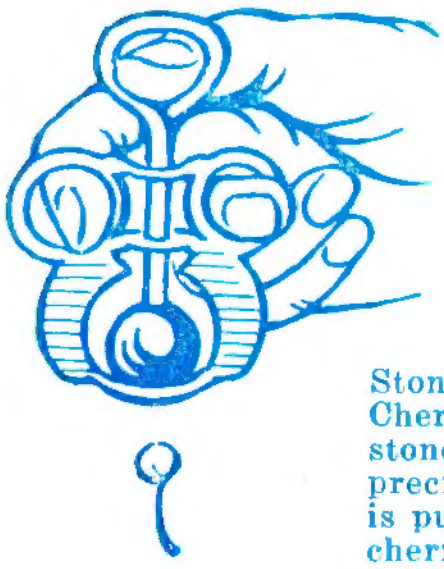
No. 36
(3 lb., 4 in. mouth.) For Peaches, Pears, and large fruits. A perfect cylinder.



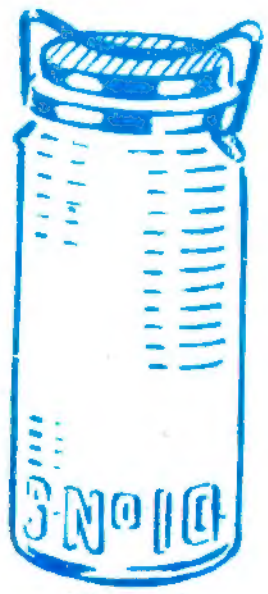
No. 31
(2 lb., 4 in. mouth.) For Tomatoes and all large Fruits. Hand will go right to the bottom.

No. 14
(1 lb., 3 in. mouth.) For Berry Fruits, Jams, etc.

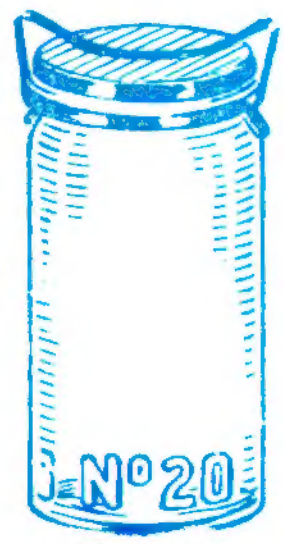
FOWLERS "VACOLA" CHERRY STONER



Stoned Cherries and Cherry Pie without stones are much appreciated. The stone is punched out of the cherry, leaving the fruit quite whole.



No. 10
(½ lb., 2 in. mouth.) For Passion Fruit, Honey, Raspberries, etc.



No. 20
(1½ lb., 3 in. mouth.) For Cherries, Figs, Prunes, Carrots, Parsnips, etc.

VACOLA "JUNIOR" OUTFIT

Every Junior Miss from eight to eighteen will want the new VACOLA Junior Fruit Bottling Outfit. Of all children's gifts, this will give the greatest pleasure and yet still be the most sensible.

With the VACOLA Junior Fruit Bottling Outfit, your daughter will learn for herself how easy it is to bottle fruit by the Fowler Method. It's perfectly safe to use and, with a minimum of supervision from mother, your daughters will be able to preserve a supply of fruit in the delightful little vacuum self-sealing bottles supplied with the Outfit. The VACOLA Junior Fruit Bottling Outfit will be a joy to the whole family; it's a complete Bottling Outfit in miniature.

FOWLERS VACOLA

SPECIAL HEAT RESISTING GLASS COVERS

At the request of many of our clients for a glass covered bottle, we have now perfected a NEW HEAT RESISTING 3" GLASS COVER for use with Nos. 8, 14, 17, 20, 27, 40, 48, 200 and 270 Bottles and ¼-lb. Meat Moulds. Also 4" GLASS COVER for use with Nos. 31, 36, 65 Bottles and ½-lb. Meat Moulds.

These are the ideal covers for Vegetables and Meats, and give the perfect finish to any product.

They are now obtainable from all Leading Hardware Stores to fit any of the above size bottles you may have, but remember! You must also have 3½" and 4½" Spring Clips to seal them.

The Clips may be used over and over again as they are removed after the Bottles have sealed.

FOWLERS VACOLA STERILIZERS MAY BE OBTAINED WITHOUT BOTTLES, BUT COMPLETE WITH 112-PAGE COPYRIGHT BOOK OF INSTRUCTIONS AND THERMOMETER AS ILLUSTRATED ABOVE.

You do bottle your own fruit!
You do make your own jam!
You do make your own pickles!

but DO YOU MAKE
YOUR OWN TOMATO SAUCE?
with FOWLERS

"SAUSETTA"

Blended Spices

"SAUSETTA" is Blended Spices. It has all the ingredients (Spices, Flavourings, etc.), scientifically blended to make perfect Tomato or Chutney Sauce and numerous other pickles including Red Cabbage, Cauliflower, and Green Tomato, etc. etc.

With every bottle is a recipe book giving recipes of how to make the most palatable sauces and pickles.

VACOLA

FRUIT & VEGETABLE JUICE EXTRACTOR OUTFIT

consisting of:—

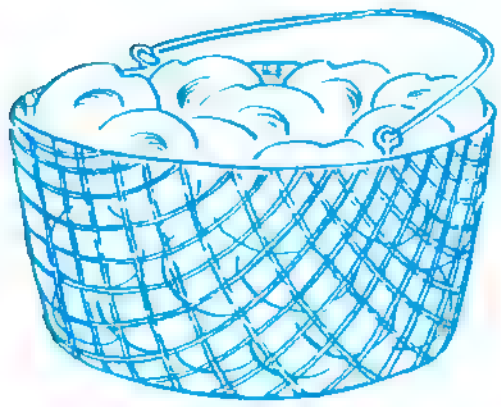
1 Vacola Fruit and Vegetable Juice Extractor Machine
3 only Patent Swing Stopper Fruit Juice Bottles
1 only Special Wood Feeder Plunger
1 Copyright Instruction Book—
"Fowlers Method of Extracting Fruit and Vegetable Juices."

Vegetable juices contain valuable mineral salts, and the juices of carrots, parsnips, celery, etc., are rapidly becoming increasingly popular as a health diet.

The Patent Bottles supplied with the Fowlers Vacola Fruit and Vegetable Juice Extractor are ideal for storing juices in an ice chest or refrigerator, as the swing stoppers can be securely clamped down, thus preventing any odours from other foods contaminating the juices. Fruit and vegetable juices should never be put away in jugs or open-necked vessels. Should it be desired to keep the juices for a long time, they should be sterilized in the patent bottles. Full instructions are supplied with each Extractor Outfit.

IDEAL PRESENT FOR . . . CHRISTMAS . . . NEW YEAR . . . BIRTHDAYS . . . KITCHEN-TEAS AND WEDDINGS

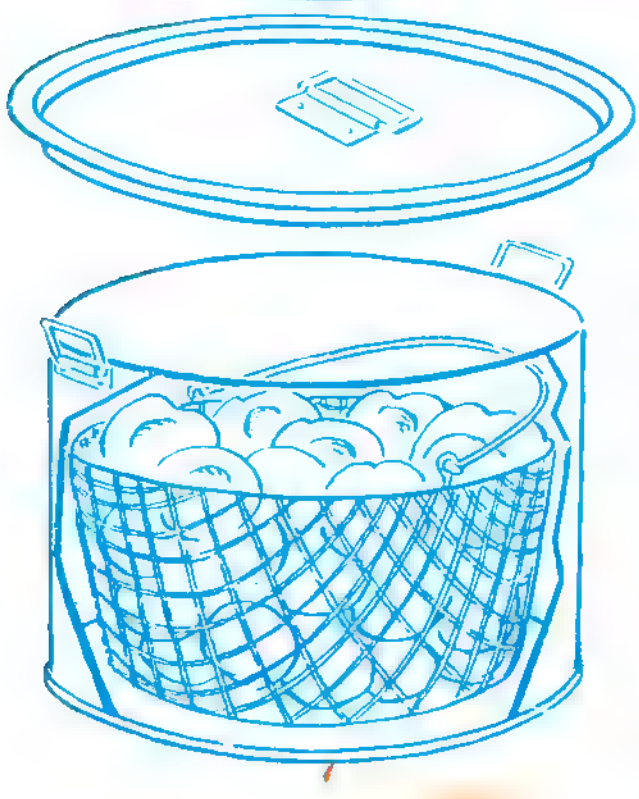
VACOLA BLANCHING BASKET & BOILER



FOR SCALDING PEACHES AND TOMATOES WHEN REMOVING THEIR SKINS.

FOR BLANCHING VEGETABLES.

FOR WASHING VEGETABLES AND FRUITS PRIOR TO COOKING OR BOTTLING.



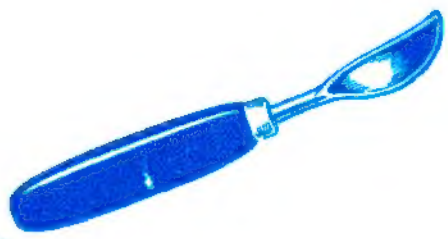
Removing peach skins is simple with this equipment. Just cut the peaches in half and after removing the stones, drop the halves into your Blanching Basket. The Basket is now placed in the Boiler containing the boiling soda water. After a few minutes, lift out basket and place peaches in cold water, the skins will then rub off quite easily. You can save time if you have **two** Baskets, for while one Basket of fruit is being blanched the other can be rinsed in clean water ready for bottling.

Mrs. B. Thrifty SAYS:—

Owners of BOTTLING OUTFITS *you need* THESE

HOME FRUIT BOTTLING HELPS

1



2

3

Six aids to better bottling, each of them a definite help, and all of them packed in a sturdy attractive carton.

If you own a Vacola Bottling Outfit you'll need this set and you'll be proud to give it as a gift to any other housewife who owns a Bottling Outfit.

The Set comprises:
Peach Pitting Spoon, Vacuum Bottle Opener, Packing Stick, Stainless Fruit Knife, Pear Corer and Bottle Tongs.

Ask your Storekeeper for the attractive carton containing

FOWLERS VACOLA HOME FRUIT BOTTLING HELPS

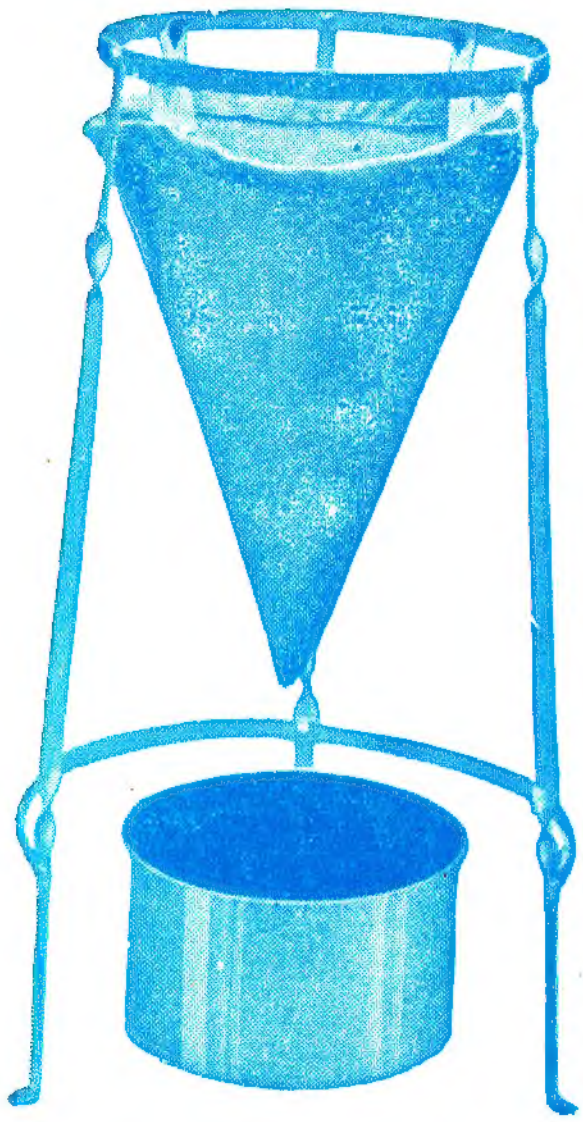
4. Pear Corer. 5. Fruit Knife. 6. Bottle Tongs.



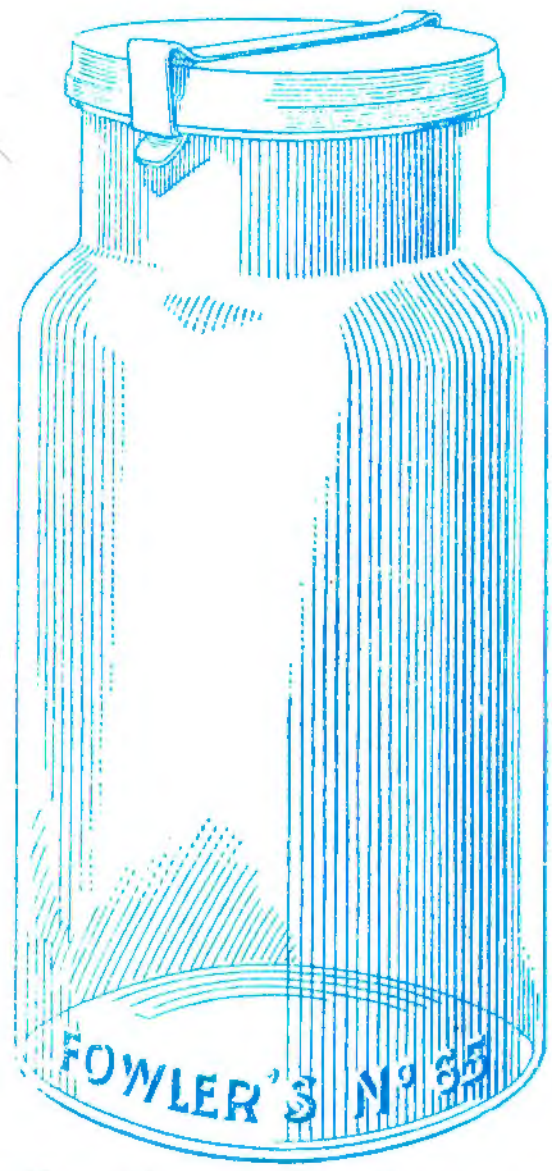
FOWLERS VACOLA JELLY BAG AND STAND

Just when the Fruit is ready for making Jelly it usually happens that a strainer has to be improvised, often with disastrous results to the Jelly. By always having a Jelly Bag in the house you will save time, worry and patience, while a complete Bag and Stand will make Jelly making easy and pleasureable.

STORAGE OF FRUIT FOR JAM-MAKING, ETC.

The No. 65 Bottle is especially suitable for hotels, cafés and households to pack quantities of fruit unsweetened, so that the contents may be emptied from the bottle and made into pies or puddings, exactly the same as with freshly gathered fruits, the sugar being added to taste when used. The housewife finds this an admirable bottle for storing fruits for jam-making. It holds about 5 lbs. This is a handy quantity, for, with the addition of 5 lbs. of sugar, it can be made into 8 or 9 lbs. of jam. Housewives will see the advantage of this, as the fruit can be put down in the fresh state, without the necessity of laying in large stocks of sugar, and can be made into jam in the cool weather, as required.

BOTTLE FRUIT FOR JAM MAKING

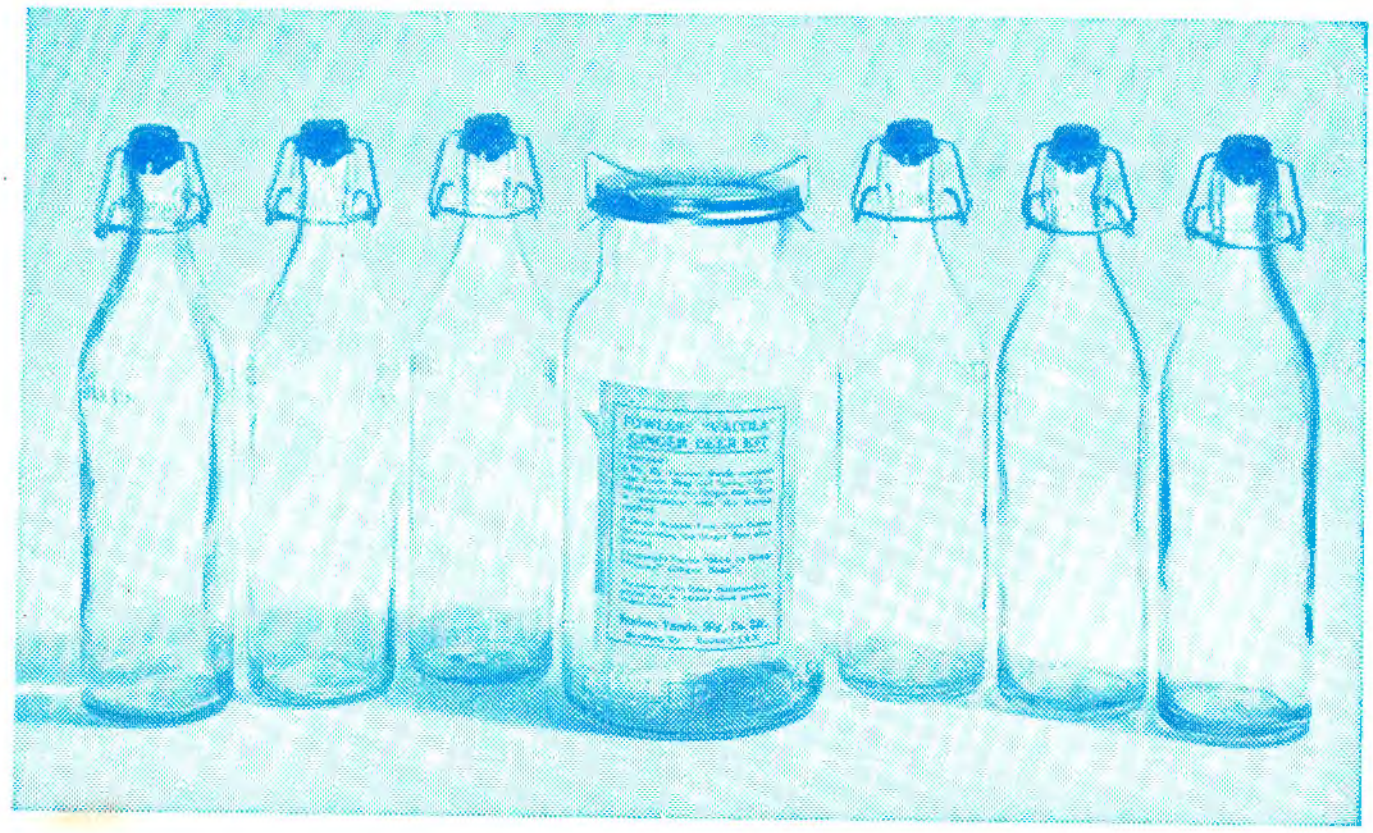


(5-lb., 4-in. mouth.) Ideal for Storing Fruits for Jam Making.

BREW YOUR OWN GINGER BEER

WITH "VACOLA" GINGER BEER KIT

Fowlers Ginger Beer Plant Culture has been introduced into thousands of Homes, and with the aid of the Bottles forming the "Ginger Beer Kit" and Fowlers Copyright Recipe a delightfully sparkling Ginger Beer can be "brewed" in your home with very little trouble. It is simplicity itself. Leading storekeepers supply the Kit complete with the Recipe for a nominal sum. Ask your storekeeper about it!



USE UP YOUR ODD-SIZE JARS AND SEAL YOUR JAMS, JELLIES AND PRESERVES

with

KLEER-VIEW JAM COVERS

Fowlers KLEER-VIEW PRESERVE COVERS are transparent. They enable you to seal all your jams and jellies hygienically and quickly. You merely moisten the covers and apply — they tighten themselves while drying and form an airtight seal.

24 neat little labels for "jar-identification" are supplied in every packet of KLEER-VIEW PRESERVE COVERS.

Mrs B. Thrifty says...
Kleer View
PRESERVE COVERS
The Housewife's friend
TRANSPARENT

YOU CAN SEE THE PRESERVES through the COVERS
CONTENTS 24 COVERS, RUBBER BANDS AND LABELS FOR 1lb. AND 2lb. JAM JARS.

Kleer-View Jam Covers

Fowlers
VACOLA
PLASTIC FRUIT PRESERVING SKIN
For Sealing all Types of Odd Bottles & Jars
(LEAD FREE & NON TOXIC)
MADE IN AUSTRALIA
THIS SKIN IS IDEAL FOR SEALING HOME-MADE JAMS & JELLIES
FOWLERS VACOLA MANUFACTURING COMPANY LIMITED

Plastic Skin

"VACOLA" Plastic Preserving Skin

Any type of jar or bottle of preserved fruit can be effectively sealed with Fowlers VACOLA PLASTIC PRESERVING SKIN which is both lead-free and non-toxic. Complete instructions for using are included in each packet which contains enough skin to seal a dozen or more assorted jars. NOT SUITABLE FOR VEGETABLES.

VACOLA PLASTIC PRESERVING SKIN is simple to use and economical, too! It can be used over and over again.

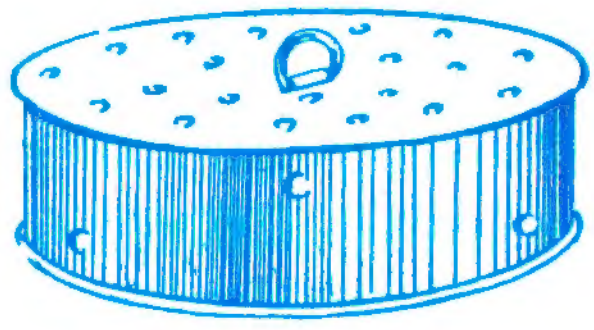
Fruit preserved with Plastic Skin should be used within three months.

MILK AND FRUIT JUICE BOTTLES

These Bottles are specially made with Swing Stopper and Rubber Ring. They are exceptionally useful for containing Milk and Fruit Juices. They may be used in the Sterilizer supplied with the Fruit Bottling Outfit, and by this means a perfect Vacuum Seal is obtained. Full directions are contained in the Book of Instructions for making and bottling Fruit Juices and Cordials, but if it is desired to bottle Milk, application should be made to the Storekeeper for special instructions, which will be supplied by the manufacturer on request.

HYGIENIC AND SERVICEABLE.

STEAM COOKING STAND



When food is in short containers such as shallow Pudding Basins, etc., it is advisable to use a Steam Cooking Stand which can be supplied at a small extra cost.
